ABOUT GEI

Incorporated in 1986, Gregsak Engineering, Inc. has brought together an aggressive, self-motivated staff of experienced civil engineers who can turn your ideas into well-developed, technically reliable plans.

We've built positive relationships with city, town and state agencies, utility companies, and developers throughout New England, and are able to provide project services from concept to construction.

Affiliations:

- <http://www.asce.org> - American Society of Civil Engineers
- <http://www.awwa.org> - American Water Works Association (NH)
- <http://senh.org> - Structural Engineers of NH
- <http://www.ncsea.com/about> - National Council of Structural Engineers

Licenses:

- Professional Engineer, New Hampshire, Massachusetts, Maine, Connecticut
- Licensed Septic Designer, New Hampshire
- Licensed Soil Evaluator, Massachusetts

ENGINEERING SERVICES

GEI provides quality professional services in Civil and Structural Engineering including Site Plan Design, Subdivision Design, Concrete Design, Water Systems Design, and Environmental Consulting. As a part of a multidisciplinary firm, we are able to assemble an efficient team of experienced professionals and support staff. Our ability to maintain an overall project perspective throughout the design process provides pragmatic, economical design services that create value for our clients as well as our communities.

Site Plan Design - Commercial, Industrial, and Residential. GEI offers comprehensive services in both, the technical aspects and in partnering with local, state and federal agencies to obtain approval for each project.

Subdivision Design - Commercial, Industrial, and Residential. GEI offers comprehensive planning and estimating services in Commercial, Industrial and Residential projects. We continue to serve clients

through construction phases as well as completion and occupancy.

Concrete Design - Pre-cast concrete. GEI understands the complexities of working with concrete admixtures, jointing, reinforcing and curing. It is precisely this knowledge that enables GEI to successfully add concrete as part of our overall project plan.

Water Systems Design - Municipal Water Systems. GEI offers comprehensive services in both, the technical aspects and in partnering with local, state and federal agencies to obtain approval for each project.
